Instructions for Point per Dart Calculation

Each player counts how many turns they have thrown until their score reaches 70 or less or their opponent goes out. The player then writes their number of turns on the scoresheet at that point.

If one player finishes the game before the other player has reached 70 or less then the losing player would record just the number of turns that they had thrown and their score (see Example 3)

If you need to erase your board during the game, just count the number of turns that you have thrown so far and write that number down near the bottom of the scoreboard. Then, when you do reach 70 or less or the opponent has finished the game, add the number of turns you wrote on the bottom of the board to the current turns and write it on the scoresheet

Example 1.

Game1 Player A had 9 turns before their score was 70 or less, so they will record 9 turns and a score of 50 Game1 Player B had 8 turns before their score was 70 or less, so they will record 8 turns and a score of 32

Example 2.

Game2 Player A had 8 turns before their score was 70 or less, so they will record 8 turns and a score of 52 Game2 Player B had 8 turns before their score was 70 or less, so they will record 8 turns and a score of 0 since they went out

Example 3.

Game3 Player A had 6 turns before their score was 70 or less, so they will record 6 turns and a score of 0 since they went out Game2 Player B had 5 turns before their score was 70 or less, so they will record 5 turns and a score of 234

	Game 1		Game 2		Game 3			Game 1		Game 2		Game 3	
	Turns	Score	Turns	Score	Turns	Score	-	Turns	Score	Turns	Score	Turns	Score
Α	9	50	8	52	6	0	Α						
В							В	8	32	8	0	5	234
С							С						
D							D
